Questions:

1. Assume you are in the **index.html** file, and want to edit the links in the navbar. Specifically, what would the path be to link to the **about.html** page?
 - a. Answer: **/about.html**
2. Assume you are in the **index.html** file, and want to apply CSS to the page. What would the path be to link to the **index.css** file?
 - a. Answer: **../css/index.css**
3. What element would you put that path in? (Give the full element). Where would it go in the **index.html** file?
 - a. Element: **link**
 - b. Location in HTML file: **head**
4. Find where the **codepoetry2021.html** file is located in the repo. What sub-directory (folder) is it in?
 - a. Answer: **projects**
5. Imagine you wanted to add a link back to the **index.html** file in the **codepoetry2021.html** file. What would the path to that file be?
 - a. Answer: **../index.html/**
6. What about applying some CSS – namely that same **index.css** from before. What would the path be to correctly link to that file, from the **codepoetry2021.html** file?
 - a. Answer: **/css/index.css or ../css.index.css**
7. There's a file called **headshot** somewhere in the repo. Where is it?
 - a. Answer:
8. What would the path be to add that **headshot** file to the **index.html** file? What would the full element be? Where would it go in the **index.html** file?
 - a. Path:
 - b. Full Element:
 - c. Location in HTML file:
9. The **contact.html** page is a good place to add external links. What would the path be to add a link to the front page of the New York Times? What type of path is this?
 - a. Path:
 - b. What type of path:
10. What is going on in the **_data** sub-directory? Namely, what type of files are there (what is a .yml file)? Where on Anthony's site do you think the contents of those files display (take a guess, based on the names of the files)? *You might need to look at Anthony's actual website.*
 - a. What is a .yml file: **an updating file**
 - b. Where is the data in those files displayed:

11. What about the **_includes** sub-directory? What do you think the files in that sub-directory accomplish, based on their titles? *You might need to look at Anthony's actual website.*
 - a. Where do the files in the _includes sub-directory appear:
